EXPERIENCE

Ontario Digital Service – Full Stack Developer

JavaScript, React, Firebase Sep – Dec 2020

Developed and launched 3 new versions of Ontario's COVID-19 data visualizations (covid-19.ontario.ca/data), **averaging over 450,000 unique views per month**

Initiated and completed the refactor of styles on the project by **removing over 2,000 lines**, and optimized the project's build pipelines, **reducing average build times by 52%**

Architected the frontend of ServiceOntario's future appointment booking system using React and Firebase, which will reduce wait times by 90% and be used by **over 5 million people annually**

Ontario Digital Service – Product Designer

JavaScript, React, Figma Jan – Apr 2020

Redesigned and developed an AODA/WCAG 2.0 compliant web platform to **help 5 million users** renew identification annually

Spearheaded Ontario's COVID-19 microsite (covid-19.ontario.ca) which had **1.25 million viewers** the week after launch

Conducted over 25 usability tests to validate design decisions and iteratively improve the platforms in one week sprints

Microsoft – Designer & Software Developer

JavaScript, React, Azure, Figma Jul – Aug 2019

Led and designed an internal inventory tracker used **by over 2,000 employees**, reducing the request processing time for marketing materials by **over 85%**

Collaborated with product managers, developers, and stakeholders to organize MVP features and future roadmap

Presented the beta launch of the inventory tracker to over 800 employees and executives

COMMUNITY

Blueprint – Product Designer & Frontend Developer

JavaScript, React, MongoDB Aug 2020 – Present

Designed and implemented the frontend of a group decision making platform (arbitrium.web.app) that has helped **allocate over $2 million in funds** to local non-profits (uwblueprint.org)

CUTC (2020 & 2021) – Lead Designer

Figma, CSS/SCSS Dec 2019 – Present

Led the design team to establish a digital presence for the conference with **over 2,000 attendees** (cutc.ca)

SKILLS

Product & Design

Research: User testing and data analytics

UX: Systems thinking, Information architecture, Wireframing and prototyping, Journey mapping

Tools: Figma, Sketch, Balsamiq, Zeplin, Adobe Creative Suite, Jira, Confluence

Development

Languages: JavaScript/TypeScript, Java, HTML, CSS/SCSS, C++, C#, Python

Frameworks/Libraries: Spring Boot, React, Gatsby, Redux, JUnit, Bootstrap

Tools: Docker, SQL, Firebase, Unity, Microsoft Azure, Google Cloud Platform, Neo4j, PostgreSQL, Cypher

PROJECTS

Clubhouse – uXperience (1st place)

Spearheaded the design of a privacy-centric platform for students to connect in online after-school activities

boba buds – Starterhacks (Best pitch)

Designed a bubble tea social media and food ordering app by synthesizing user research

Six Degrees of Spotify /six-degrees

Built a web application to show that artists are separated by six or fewer song collaborations

Maintained a graph database with **400,000 artist relationships** parsed from the Spotify API

Created unit and integration testing suites to ensure proper search results and a quality user experience

EDUCATION

University of Waterloo

Systems Design Engineering (BASc)

Sep 2019 – Apr 2024

Cumulative GPA: 3.95/4.0

Relevant courses: Human Factors in Design, Data Structures and Algorithms, Design, Systems & Society
