work experience

Ontario Digital Service · Product Designer
January - April 2020

- Applied **a user-centric design approach** to envision and create seamless online experiences for Ontarians
- Redesigned an online renewals platform in Figma to be accessible and used **5 million Ontarians annually**
- Built and designed Ontario's COVID-19 microsite (covid-19.ontario.ca) in Figma and React viewed by **1.25 million people one week after launch**
- Conducted **22 user-testing sessions** to measure success of designed interfaces for future weekly iterations

Microsoft · Software Developer & Designer
July - August 2019

- Designed and developed an inventory tracker for internal use by over **2,000 Microsoft employees**
- Built two budgeting web apps for enterprise and student markets by utilizing Sketch and React.js
- Presented the projects to over **800 employees** at Microsoft Canada's National Annual General Meeting

Self-Employed · Freelance Designer
September 2016 - August 2019

- Designed two web applications and more than **30 marketing assets**, including a logo worn by over 1000 people, and a 136 page yearbook read by over 700 community members

extracurriculars

Waterloop · Web Designer
February 2020 - Present

- Redesigned and developed components in Figma and React to be used on the new website (waterloop.ca)

CUTC · Lead Designer
December 2019 - Present

- Led the design team to establish graphical elements for the theme "Reconnect" for the 2020 Canadian Undergraduate Technology Conference held virtually for over **500 students and 25 sponsors**
- Defined an end-to-end organizational process by emphasizing deliverables such as social media graphics, website designs, illustrations, and app UX/UI design
